

Quotation: Choviar Tiffin App

Date: July 22, 2026 **Prepared by:** Ankur Gosar

1. Project Overview

Development of a custom, end-to-end food ordering and management application designed specifically for daily tiffin services. The solution includes distinct portals for customers, kitchen administrators, and delivery personnel.

2. Scope of Work

2.1. End-User Ordering Portal

A user-friendly interface for customers to interact with your service.

- **Menu Browsing:** View the available menu for upcoming meals.
- **Order Placement:** Seamlessly place orders for daily tiffins.
- **Account Management:** User registration, login, and basic order history.

2.2. Admin Panel & Kitchen Management

A centralized dashboard to manage business operations.

- **Menu Configuration:** Easy-to-use tools to set and update "Tomorrow's Menu".
- **Kitchen Summary:** A dedicated view aggregating all orders to provide a clear total count of items needed for preparation (e.g., total rotis, total sabzis).
- **Order Oversight:** View and manage all incoming orders.

2.3. Delivery Portal

A streamlined interface for delivery staff.

- **Delivery Assignments:** View active orders requiring delivery, along with customer addresses.
- **Status Tracking:** Mark orders as delivered to update the central system in real-time.

3. Technology Stack & Hosting

- **Development:** Modern web technologies ensuring a responsive user experience across both desktop and mobile devices.
- **Hosting:** The application will be deployed using robust **Free Tier** services (such as Vercel/Netlify for the frontend and Firebase/Supabase for the backend). This ensures **zero recurring monthly hosting costs** while maintaining high availability and performance within standard free tier limits.

4. Investment

Description	Cost
One-Time Application Development Fee <i>(Includes all features listed in the Scope of Work above)</i>	15,000
Ongoing Hosting Costs	0 (Free Tier)

Note: This is a one-time development fee. Any future feature additions, native mobile app development, or scaling infrastructure beyond the free tier limits will be quoted separately.
